

Mr./Mrs./Ms./Owner

The City of Lake Wales requires all grease haulers and clear oil haulers doing business within the City to submit hauling manifest to us or designee to help keep grease generating/oil generating facilities in compliance with our D.E.P. / E.P.A. permits. Companies in compliance with these requirements are placed on the preferred haulers list. Grease/oil generating facilities within our City will be provided the list.

What we need from your company is:

- 1) Complete the Preferred Haulers Registration Form and return via e-mail or USPS.
- 2) Send the City a list of clients within our City. (we do not want to send your current clients duplicate information)
- 3) Send the City or designee a copy of pump out manifest. (Quarterly)  
\*NOTE: No pump and returns/decanting will be permitted within the City of Lake Wales service area.

It's that easy.

If you have any further questions, please contact myself or Michael Oriend If you are in Lake Wales please stop by.

Thank you for doing your part in keeping Lake Wales beautiful!
